Cephe Detay Çözümleri

Façade Detail Solutions

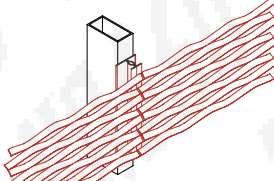

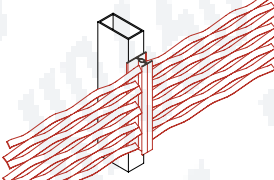

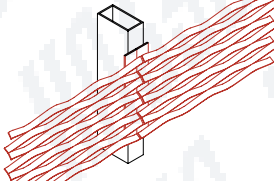

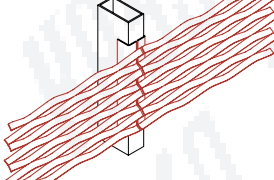

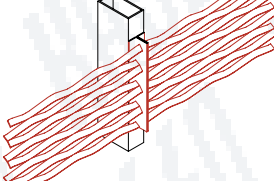

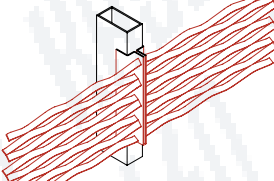

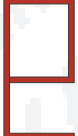

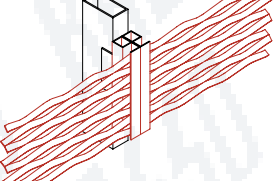

Kasso'nun sunduğu genişletilmiş metal ürünler, farklı geçirgenlik değerlerinde üretilebilmekte, böylelikle gün ışığı, ısı ve hava akışının kontrol edilebilmesine olanak tanımaktadır. Patentli, özel tasarlanmış makinelerimizle elde ettiğimiz tasarım esnekliği sayesinde birçok seçeneği özelleştirebiliyoruz. Değişken yarı saydamlık seviyelerinde kullanılabilen genişletilmiş metal paneller, çok çeşitli malzeme, desen, form, yüzey bitişi ve boyutlarda uygulama imkânı sunmaktadır.

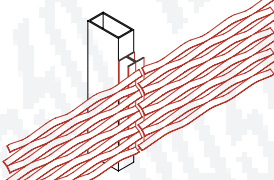

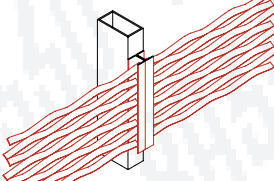

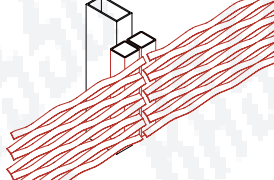

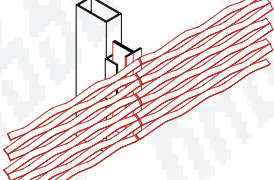

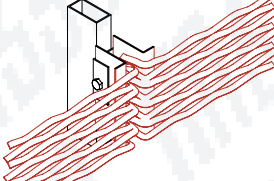

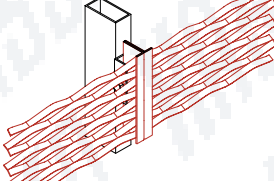

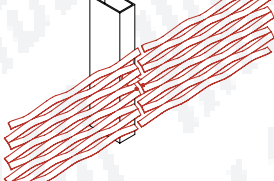

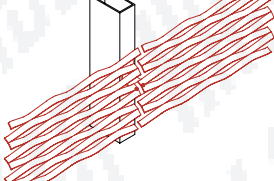

Bu katalogda genişletilmiş metallerin -Sc1Cephe Sistemine - yapı taşıyıcısına ankraj ile sabitlenmiş kutu profillere çeşitli ara elemanlarla montajlandığı detay çözümlerine yer verilmiştir. Yaygın olarak kullanılan altı tip cephe sisteminde bu çözümler uygulanabilmektedir. Kasso genişletilmiş metal ürünler, farklı yapı ve konstrüksiyon sistemlerine entegre edilebildiği gibi, teknik ekibimiz aynı zamanda müşterilerimiz için projeye özel çözümler geliştirebilmektedir. Çerçeve tipi çeşitliliği ile özgün detay çözümleri sunmaktadır.

The expanded metal products offered by Kasso can be manufactured with different permeability values, thus enabling control over the amount of daylight as heat and air flow. Our patented, specially designed machines give us the design flexibility to customize many options. Expanded mesh metal panels can be applied in varying levels of translucence, with a wide variety of materials, patterns, forms, surface finishes, and dimensions available.

This catalog features detail solutions for the Sc1 Façade System, where expanded metals are mounted via various intermediate elements onto box profiles which are anchored to the structural bearer. These solutions can be applied to six commonly used façade systems. Not only can Kasso expanded metals be integrated into different structural and construction systems, but our technical team is also equipped to develop project-specific solutions for our clients. The variety of frame types also allow for original detail solutions.
